### Abstract

All authors must mutually agree that the paper is to be submitted to the ICE SEAM 2011. The use of this Template for the abstract preparation is strongly recommended. The title of paper should be centred and written in bold script, font size 14 pt. This should be followed by a 12 pt space before the author's/authors' name(s). The name(s) should be centred, written in 12 pt, normal script and given in the following order: given name, (initials) and surname. Author names and affiliations should be linked with corresponding superscript Arabic numerals. After the name(s) there should be a 12 pt space before the affiliation list. Affiliations should be centred, written in 10 pt normal script, and include at least the name of the institution, city and country. The corresponding author should be marked by an asterisk (\*). At least e-mail and telephone number for the corresponding author must be given. Furthermore, the abstract must be typed in Word format, using Times New Roman, font size 10 pt, single spaced, and fully justified. The abstract must be prepared in A4 format (297 x 210 mm) with 25 mm left margin and 20 mm other margins. The abstract should be 300 words in maximum. The abstract should clearly state the purpose of the work, approach and methodology, limitations, significant results, with concise conclusions or recommendations included. The main body of the abstract is to be followed by five keywords in maximum, 10 pt normal scripts, and separated by commas. The first letter of each keyword should be capitalized. Finally, all abstracts must be submitted through the online submission system at [www.iceseam.com](http://www.iceseam.com) or email to [iceseam2011@iceseam.com](mailto:iceseam2011@iceseam.com) before June 30, 2011.

**Keywords:** Abstract, Sustainable energy, Advanced Material.
